## SCAN4SAP White Paper

Introducing scan4sap, a revolutionary warehouse management solution meticulously crafted from the ground-up, drawing inspiration from real-life scenarios in collaboration with a partner company that seamlessly transitioned into a satisfied user of the system. This innovative tool is designed to streamline and enhance inventory management in warehouses, offering scanners direct connectivity to SAP Business One through a robust SAP API connection. With scan4sap, users gain unprecedented control over various aspects of warehouse operations, including **Purchasing**, enabling the creation of Goods Receipt Purchase Orders against visible Purchase Orders directly within the scanner's software. Facilitating efficient **inventory management**, it empowers users to execute Stock Transfers, Stock Searches, Stock Countings, Goods Issue, and Goods Receipts effortlessly. Beyond inventory control, scan4sap extends its capabilities to **Production**, allowing the creation of Issue for Production documents linked to SAP Production Orders or Receipt from Production documents tied to base Production Orders. Moreover, it facilitates seamless Picking and Packing of SAP **Pick Lists**, ensuring a cohesive workflow. The versatility of scan4sap extends to enabling users to effortlessly generate **barcoded labels** for both products and documents, such as Delivery Notes, providing a comprehensive solution for warehouse optimization.

Discover the practical advantages of scan4sap through our **60-day trial**, available at no cost. Take your time to explore the user-friendly interface, SAP integration, and overall efficiency it brings to warehouse management. This trial is designed to help you decide whether scan4sap aligns with your business needs. At the end of the trial period, you can choose to continue with buying a license or explore other options based on your experience. It's a straightforward opportunity to test the waters and see if scan4sap is the right fit for your warehouse operations. Try it today and make an informed decision for your business.

The licensing costs **per year** are always known:

- **£555** **One** concurrent-user license per physical location
- **£1750** **Four** concurrent-user license per physical location
- **£3500** **Eight** concurrent-user license per physical location
- **£6000** **Unlimited** concurrent-user license per physical location

Take the first step toward optimizing your warehouse operations—try scan4sap today and experience the difference for yourself. Your 60-day trial awaits, offering a risk-free opportunity to elevate your inventory management. Contact us via <https://jetcode.tech>
